

SHAQUILE SURYA

Supplier Quality Manager | VDA 6.3 Qualified Auditor | Semiconductor & Automotive Supply Chain

Budapest, Hungary | +36 30 563 8207 | shaquile.surya@gmail.com | [linkedin.com/in/shaquile-surya-86401b129](https://www.linkedin.com/in/shaquile-surya-86401b129)

EU Blue Card Holder | Full Authorization to Work in the European Union | shaqsurya.github.io

PROFESSIONAL SUMMARY

VDA 6.3 Qualified Auditor and Supplier Quality Manager with 10 years of experience spanning semiconductor process engineering and automotive supply chain governance across 4 countries. Applied for and secured a role 2 grade levels above current position to join Infineon Technologies in Hungary, delivering zero FAR, zero line disturbances, and double-digit VDA 6.3 audit score improvements within the first year. Pioneered an industry-first role-play based supplier behavioral change approach and spearheaded global Technical Cleanliness deployment outside core scope. MBA graduate (93.74%) and VP-recognized problem solver with a track record of 7 consecutive SGA Championship awards at Excelitas Technologies, combining engineering precision with strategic quality leadership across global supply chains.

CORE COMPETENCIES

- Supplier quality governance, supplier development, escalation and containment management
- VDA 6.3 / VDA 2 / IATF 16949: audits, PPAP/PPA, requalification, and compliance management
- Structured problem solving: 8D, DMAIC, 5-Why; statistical methods: SPC, Cp/Cpk trend analysis
- Cross-functional leadership across Quality, Engineering, Production, Procurement, and R&D
- Process optimization: defect reduction, yield improvement, cycle-time improvement, and standardization
- Technical Cleanliness (raw materials and packaging): standards deployment and supplier alignment

PROFESSIONAL EXPERIENCE

Supplier Quality Manager

Infineon Technologies, Hungary | January 2024 - Present

Supplier Quality Governance | Plastic Housing and Lid | Audits, Escalations, PPAP/PPA, Risk Assessments | 5 Key Suppliers across Germany, Romania, Czech Republic, and Austria

- Led supplier quality governance, audits, escalations, and supplier development across a 4-country supplier portfolio to protect production stability and customer deliveries.
- Drove cross-functional 8D containment and corrective actions; ensured preventive measures and lessons learned were fully implemented.
- Coordinated PPAP/PPA approvals, requalification, and new material releases aligned with VDA 2 and IATF 16949.
- Led supplier evaluation activities from M0 through M9, coordinating milestone reviews, quality readiness checks, and risk mitigation actions.
- Spearheaded global Technical Cleanliness standards deployment for raw materials and packaging across international suppliers - a strategic initiative outside core role scope, successfully delivered through cross-functional internal and external collaboration.
- Regularly called upon by colleagues across teams to lead line stoppage resolution and complex problem solving due to recognized expertise and speed of execution beyond own portfolio scope.
- Delivered Director-level quality governance presentations covering KPI scorecards, escalation status, and supplier performance reviews.
- Conducted VDA 6.3 P1 Potential Analysis audit on new supplier candidate in Austria, successfully qualifying the site for consideration - expanding the approved supplier base with a structured risk-based assessment.
- Led subordinates in developing Excel and Tableau dashboards for issue tracking, escalation visibility, and management reporting.

Key Achievements:

- * Successfully applied for and secured a role 2 grade levels above current position (Infineon GG10 to GG12, equivalent to a Senior Engineer to Manager level jump), transitioning from Senior Process Engineer in Indonesia to

Supplier Quality Manager in Hungary - a cross-country, cross-functional leap validated entirely on merit by Infineon's hiring process.

- * Pioneered a role-play based supplier engagement method as a self-developed behavioral change approach - the first of its kind in the organization - driving measurable quality mindset improvement across key supplier accounts.
- * Closed 9 incomplete mold SCARs with 85% resolution rate, reducing escalations via root cause analysis and supplier coaching.
- * Achieved 0 FAR and 0 line disturbances in FY23/24 portfolio (full production compliance).
- * Achieved 97% A-rating in VDA 6.3 audit for Gottlicher supplier (FY24/25) with zero delays.
- * Maintained on-time containment for all critical customer escalations throughout tenure.
- * Recovered missing VDA2 documentation for Easy 1C/2C project within one week through direct supplier negotiations.
- * Resolved 62 mm contamination SCAR within Q2 2025 via 8D methodology (met 80% target).
- * Improved Agrodur Germany VDA 6.3 P4-P6 audit score by 9% to 90% through targeted corrective actions.
- * Achieved 91% A-rating in VDA 6.3 P2-P4 audits at Possehl Germany and Czech Republic; boosted Czech site 30% YoY in FY24/25.
- * Successfully managed 5 key suppliers through regular auditing, structured performance reviews, and proactive quality governance.

Senior Unit Process Engineer - End of Line

Infineon Technologies, Indonesia | January 2022 - October 2023

Trim and Form, Laser Marking | Power Devices (DSO Packages) | Deliberate pivot into Supplier Quality Management

- Owned and optimized end-of-line processes to meet yield targets, reduce defects, and resolve machine abnormalities.
- Led cross-functional RCA and corrective actions using DMAIC/8D; standardized processes to prevent recurrence.
- Qualified new materials and tooling; ensured production readiness and compliance with internal requirements.

Key Achievements:

- * Reduced Cut Lead Contamination, Chipped Casing, Solder Flakes, Bent Lead, and Package Contamination by 70-78% through process standardization.
- * Achieved greater than 99.6% yield and Cpk greater than 1.67 across key projects including New Lead Frame Supplier, Hammer Head/Nickel-Plating, and Tier Bar Less Packages.

Process Engineer II/III | Cross-Site Project Coordinator

Excelitas Technologies, Indonesia and USA (Fremont, CA) | June 2017 - January 2022

Back Line Assembly, Quartz Sawing, Spot Welding, Pump and Fill, Testing, Packaging | Cermex Xenon Lamps

International Assignment: Handpicked to represent the Indonesia site for a cross-continental project transfer at Excelitas Technologies HQ, Fremont, California, USA (July - December 2019).

- Managed critical end-to-end processes with yields up to 99%; halted production when requirements were not met.
- Led DMAIC evaluations and 5-Why RCA for high-priority defects; reduced failure modes through automation, jig optimization, and process standardization.
- Led and mentored teams in defect management and issue resolution; partnered with Global R&D on device and material changes.
- Built Excel-based monitoring tools to track yield and defect trends, enabling data-driven prioritization.

Key Achievements:

- * Youngest in company history to be promoted from Engineer I to Engineer II in just 1.5 years (2018), and again the youngest to reach Engineer III (2021) - cleared for promotion after 1 year but delayed solely by a company-wide cost freeze, not performance.
- * Handpicked by management for international assignment in the USA; led full equipment transfer and qualification from California to Batam, delivering 36,700 units in Q4 2019 - Q1 2020.
- * Reduced defects by up to 85% across multiple devices through automation, jig optimization, and process improvements.
- * Maintained 98% yield (target 95%); cut Y1916A defects by 62%, saving approximately \$60,000 annually - formally recognized by management and VP level as a significant cost and quality win.

- * Cut cycle times by approximately 50% and eliminated non-value-added steps, boosting productivity significantly.
- * Delivered major quality gains: 83% fewer splash issues, 54% fewer chip-off/slant defects.
- * Championed 7 consecutive DMAIC improvement projects at Excelitas SGA Project Championship (2017-2021), winning 1 Bronze and 6 Silver awards - the only Engineer to champion all 7 competing projects across the site.

Product Development Assurance Engineer

Shimano, Indonesia | August 2016 - June 2017

- Managed NPI quality activities from Design Introduction to Mass Production; coordinated audits and issue resolution.
- Developed and trained operators for NPI stability; achieved 90% yield target.

Piping Test Engineering Intern

Vallourec Asia Pacific Corp | February 2016 - July 2016

- Analyzed heat and pressure movement trends during high-pressure piping tests; designed improvement for piping movement handling.

EDUCATION

Master of Business Administration (MBA), Valar Institute (Quantic), USA

January 2025 - April 2026 | Score: 93.74%

Bachelor of Mechatronics Engineering, State Polytechnic of Batam

June 2012 - October 2016 | GPA: 3.36 / 4.00

TRAINING AND CERTIFICATIONS

- VDA 6.3 Qualified Auditor | VDA QMC (2025)
- Automotive Core Tools (APQP, PPAP, PFMEA, SPC, MSA) | VDA QMC (2025)
- VDA 2 Production Process and Product Approval (PPA) | VDA QMC (2024)
- IATF 16949 Qualification for 1st and 2nd Party Auditor | VDA QMC (2024)
- Powerful Presentation Skills | Best Presenter Award | Infineon (2023)
- Problem Solving Essentials, Yellow Belt, 8D, FMEA, SPC | Infineon (2022-2023)

LANGUAGES

- Indonesian: Native
- English: Business Fluent

ADDITIONAL INFORMATION

- Willing to relocate within Europe | Currently based in Budapest, Hungary
- Cultural experience: lived and worked across Indonesia, USA (Fremont, CA), and Hungary
